Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-23 are rejected under 35 U.S.C. 102(b) as being obvious over Evans et al US 6,372,925 in view of Grosch et al US 6,518,441.

Determination of the scope and content of the prior art (MPEP §2141.01)

Evans et al teach a process for the production of olefin oxides by reaction of an olefin and oxygen in the presence of a silver-containing catalyst in the same manner as recited in the claims. See, for example, column 1 lines 50-64 incorporated herein by reference, column 2 lines 49-58 and column 6 lines 11-35. Grosch et al also teach an analogous process wherein the partially deactivated catalyst is regenerated. See, for example, column 12 lines 42-63 and column 13 lines 16-53.

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

Patentees differ in that Evans does not teach regeneration and Grosch et al does not teach a silver containing catalyst.

Finding of prima facie obviousness--rational and motivation (MPEP §2142-2413)

However, in view of the art as a whole it would have been obvious to one of ordinary skill in the art to modify the references to obtain the cumulative results as the use of somewhat different but otherwise analogous process components in an otherwise known process would have been obvious as the results, enhanced process results, would not have been unexpected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Boeck et al US 5,905,161.

Boeck et al teach a process for the production of olefin oxides by reaction of an olefin and oxygen in the presence of a silver-containing catalyst in the same manner as recited in the claims. See for example column 2 lines 5-12, 53-61, column 3 lines 21-38 and column 5 lines 12-25. No claim is allowed.
